Product Review Screen

The screenshot displays the Admin interface for product review. The top navigation bar includes the Admin logo, a search icon, and user profile icons. The left sidebar contains a 'PERSONAL' section with links to Dashboard, Modules, Roles, and Panel Users. The main content area is titled 'All Products (32)' and includes a search bar, a 'Download CSV' button, and pagination controls. A table lists products with columns for Name, Sell Type, Include Color, Lot Size, Product MOQ, Seller MOQ, MRP, SK Price, and a View button. The first product, 'Rock-N-Bok 009', is expanded to show details: Category (Men>Casuals>Canvas), U/S (Synthetic), Upper (Synthetic foam), Lining (Synthetic Cloth), Sole (Semi AirMix), and a list of color options (Navy Blue, Orange, Grey) with their respective Article Nos. and status (Active/Deactive). Below the table, a 'Show 25 - entries' message and another pagination bar are visible. At the bottom, two modal windows are shown: one for the product image and another for pricing details, including Base Pricing, Bulk Pricing, and Size sets with Extra Charge.

Functionalities

- Show Total product count (Filtered)
- Filter – Can use all the data points shown here as filters.
- Download CSV – Download all the Filtered Data in Excel. (Will give clarity of Excel content & format later)
- Search – Can use all data points to search for an item. If we search for a variant specific keyword (for instance Color), then the whole product should come in result and not just the variant that matches the color.
- View Image – On click of any variant thumbnail image, a popup shall open showing all the angles. (refer popup at the bottom of the screen.)
- View Details Button – On Click open a popup showing extra details of that product. This popup will show the following info:
 - a. Base Pricing: MRP, Seller Price & SK Price
 - b. Bulk Pricing (if any): MOQ Pairs, Seller Price & SK Price
 - c. Warranty
 - d. Dispatch Time
 - e. Size Sets
 - f. Extra Charge for size sets (if any)
- Active/Deactive Toggle – this will change the visibility status of the variant.
