Admin – Product Review

Product Requirement Document (Overview)

Overview

This is an internal system for reviewing the products that are submitted for review from the Seller Board.

Project Team

- Iqbal Shamsi - CTO
- Pratyush Pankaj - Lead Developer
- Vikas Chauhan – Ui Designer
- Shubham Agarwal and Siddharth Rastogi - Conceptualisati

Scope

- #1 Allow admin to approve / reject product requests
- #2 Admin could use drag and drop feature to change order of images
- #3 Show admin all the information about the product
- #4 Multiple Selection for Approval and Rejection

Pages & Sections

1. **Product Review Screen**
2. Reason Popup
3. Size Sets Popup
4. Choose Seller Popup

Overview

As the seller submits any product from the Seller Board for review, that product starts to appear on this panel. This panel shows all the information of that product and lets the admin to Approve or Reject the Products.

17. Warranty
18. Dispatch time
19. Variant Color and Name
20. Variant Images
21. Total Products Count (Will show count of filtered data)

Functionalities

- Seller Filter - “Choose Seller”
 - a. This is used to filter out products based on Sellers.
 - b. By Default, “All Sellers” will be selected in this Dropdown, and all the products in review will be shown in the results.
 - c. On click of this filter, open a “choose seller” popup (refer to popup at the bottom of the screen)
- Choose Seller Popup
 - a. This popup will list down the names of sellers who have at-least 1 product submitted in Review.
 - b. It will show the count of total products under review for each seller
 - c. It will show the last submitted date for each seller i.e. the time of latest submission.
 - d. On selection of any seller, the filter will be applied and product results will be shown accordingly.
- Multiple Selection for Approval and Rejection
 - a. The “Reject Selected” and “Approve Selected” button will remain in disabled state by default.
 - b. As soon as any radio button is clicked on (on each product card), these buttons will be enabled.
 - c. On click of “Approve Selected”, update the following info for those products:
 - i. isApproved = 1
 - ii. ApprovedOn = “ Current timestamp”
 - d. On click of “Reject Selected”, open the popup “Give reason for rejection” (refer to the popup at the bottom).
 - i. This popup will contain few preset reasons and other box to manually enter any reason.
 - ii. Should have validation that it cannot be submitted if no reason is selected.

- iii. On click of Submit Button, update the following fields for the selected products:
 - a. isRejected = 1
 - b. rejectedOn = "Current timestamp "
 - c. rejectedRemarks = " Set the reason given in the popup "
- Individual Approval and Rejection
 - a. On click of Approve > update the information as mentioned in multiple case
 - b. On click of Reject > open the Reason popup. On Submit > Update the info as mentioned in the multiple case.
- Once the product is approved or rejected, it should get excluded from the results.
- Size Set Popup
 - a. On click of "Size Sets & Extra Charge" on the product Card, open this popup (ref to bottom of the screen)
 - b. This popup will list down all the Size Sets along with extra charges if any) for that product.
- Drag Image Functionality
 - a. For each product there will be multiple images for every variant/color. We will have a drag feature for changing the positioning of the submitted images.
 - b. On Approval of any product, save image urls in the order according to the updated positions.
 - c. On Approval, the first image should be saved additionally as a thumbnail.

Non-Functional Requirements

- The queries should be optimized as the current screens take a lot of time to load.
- There are a lot of pagination issues in the current screen. Please keep a special tab on the pagination while filter is on.
