Seller Board – Product Listing and Edit

Product Requirement Document (Overview)

Overview

This is the module that will help our sellers to manage their Products in a better way. Right from approval process to managing approved products and editing existing products. We will accommodate here all the changes done in the concept of Product Uploading.

Project Team

- Iqbal Shamsi - CTO
- Jayenta Yumnum - Lead Developer
- Siddharth Rastogi – Ui Designer
- Shubham Agarwal and Siddharth Rastogi - Conceptualisation

Problem We Will Solve

- Sellers can easily browse the products that they have uploaded.
- Sellers can track and manage all their approved products.
- Sellers will be able to easily edit the information in existing products

Scope

#1 Allow users to manage the Draft Sheets and Rejections

#2 Allow users to Edit Products

#3 Allow download and upload of Excel as an option to edit information of approved products

Pages & Sections

- **Draft Sheets**
 1. In Draft
 2. In Review
 3. Rejected
- **Product listing Page**
- **Excel Uploading popup**
- **Product Edit Page**

Overview

The process will start from seller board where while uploading a new product, a seller either saves it in Draft or Submits it for review. If the product has been saved in Draft, one entry of that product will get saved in the “In Draft” tab of the Draft Sheet Page. Once the product has been submitted for Review, it will pass on to the Admin Panel where our team will review the same and Approve/Reject the product accordingly. As long as the product is under in Review it will appear in “In Review” tab and the details will be non - editable. In case of Rejection, from admin, the product will start to appear in “Rejected” tab along with the reason provided. Here the seller can again edit the info and submit the product for review.

Once Approved from Admin, the product will start to show in “Product Listings” page. Where seller can Activate/Deactivate products or go in Edit mode and change certain information of that product.

Draft Sheets > Basic Data Points

- This page will have three Tabs “In Draft”, “in Review” & “Rejected”. By Default, the “In Draft” tab will be selected. All the tabs will show the count of products that lie in those respective tabs.
- Search Bar will be used to search products by Product Name, Article no, Sole, Categories etc.
- New Design for pagination.
- Data Points - According to information given by Seller at any given time, following data points will be visible based on their availability. These Data Points will be the same for “In Review” and “Rejected” tabs as well.
 - a. Brand Name
 - b. Product ID – The ID or number given by our system to any product.
 - c. Category – This will show the Main and Sub Category in following format “Main Category Name > Subcategory Name”
 - d. SK Price and Calculator – This will show the SK Price entered by Seller and calculator icon will open popup showing existing price breakup.
 - e. Dispatch time – Show dispatch time as “X Days”
 - f. Sell Type – Show Sell type of the product as “Carton” or “Lot”
 - g. MOQ – This will show the MOQ count of the Product in Pairs.
 - h. Size Sets – This will show the count of Size Sets selected for the product. Also, this will be a clickable info. On click, open a tip showing the selected Size Sets. The tip will only show the Size Sets and extra charge info and will not be editable.
 - i. Remaining Lots – Will show the sum of no. of lots entered by seller as stock for that product.
 - j. Variant Thumb Image
 - k. Variant Color Name
 - l. Variant Article No.

a. First Tab > In Draft

In Draft (7)		In Review (2)		Rejected (0)		Search by Name, Article Code, Price		Search	Back	3 of 4 pages	Next
